

Integrated Service of Tubing & Casing Inspection, Repairing and Anti-corrosion Technology

The Integrated Service refers to the whole process of tubing & casing procurement, warehousing logistics, inspection, repairing, anti-corrosion, on-site technical service and other services in accordance with API specifications, aiming at prolonging the life cycle of tubing & casing, which is an important approach to greatly reduce cost.

Technical Feature

- Strictly follow the API specifications to ensure the quality of each tubing & casing.
- Self-designed automatic maintenance production line to provide reliable and efficient services.
- EPCC (Engineering Procurement Construction, Commissioning) general contracting service.
- Self-developed inspection and repairing facilities owning 33 domestic patents.

Service Scope

- Inspection, repairing, machining, anti-corrosion and sales services for various types of tubing & casing, pup joint and attachment.
- EPCC Service in automated tubing & casing inspection and repairing Workshop.

Qualification

- API Q1, API Q2, API 5CT certifications.
- Special deduction authorization from JFE Advantech, Bao Steel, TPCO, Jiangsu Changbao Steel Tube Co., Ltd, Hengyang Valin Steel Tube Co., Ltd and other well-known global professional steel mills.
- 150 employees including 10 senior technicians, 20 intermediate technicians and 100 ordinary technicians. 14 professional teams for inspection, repairing and anti-corrosion services.
- 6 standardized production workshop, 6 modern production lines and 380 professional facilities.

Service Performance

- Inspected and repaired more than 1.5 million tubing & casing, machined over 100,000 pup joints and coated anti-corrosion coating for up to 320,000 pipes, served customers including CNPC, Sinopec, CNOOC and the international companies.
- API workshop EPCC project of the Iraq Hafaya Oil Field.
