

Leading Coiled tubing Technology

Anton is the leader of China's CT service, providing all-round CTU management services, tools technical services, oil and gas production services, operation services and supporting services, Anton have high-quality CT operation team with advanced management system.

The services are as follows:

- **Management services:**
 - CT operations programme design, technical advice, technical support services
 - Provision of equipment resource integration and equipment management services
- **Tools technical services:**
 - Provide integrated service of CT with tool technology
 - Provide tools/technical services, tool leasing, tool customization to global clients
- **Oil recovery service**
 - Provide technical service of velocity string, and customized production of velocity and supporting products
 - Providing Intelligent CT String Matching Service
- **Operational Services:**
 - Provide full life cycle CT service technology for oil and gas wells, covering logging, completion, stimulation, work-over areas
- **Supporting services:**
 - With 20 sets of CT units, more than 100 sets of auxiliary equipment, more than 200 professional technical service team
 - The world's top equipment, down-hole tools, design software, construction simulation software complete

Service performance:

Served more than 20 customers at domestic of China and abroad, including Petro-China, Sinopec, Shell, Total, EOG, Loukoil, BP, etc., well applied in various well conditions environment of conventional oil and gas reservoirs and unconventional oil gas reservoirs such as shale gas, coal-bed methane, dense oil and gas.

- Since 2009, the world has completed more than 5000 wells of CT operations, creating a number of construction records in the industry
- China's first shale gas horizontal well sand blasting perforation, plug/drilling plug operation
- Setting a new record of milling 23 plugs in one single trip.
- Milling plugs in 7" casing, the max wellbore operation for CT.
- CT operation maximum depth 7366 m; drilling plug operation maximum well depth 6300 m.
- A single drill continuous drilling and grinding bridge plug 45, the number of single drilling and grinding bridge plug maximum record
- China CT Segmentation Transformation Technology Domestic Construction Performance Leading.

The leading oilfield technology service company
in the emerging markets of global oil and gas development
